Kanpur, Uttar Pradesh, India

Professional Summary

Full-stack developer with hands-on experience building scalable web applications using React.js and Express.js. Proficient in Linux(Ubuntu), Docker, and AWS (EC2, S3, IAM), with academic projects focused on designing scalable microservices and automating cloud workflows.

Education

Bachelor Of Technology, Computer Science (Expected 2026)

Pranveer Singh Institute of Technology, Kanpur

CGPA: 8.54/10.0

(Till 5th sem)

Senior Secondary (XII), Science (2021)

Percentage: 85%

Maharishi Patanjali Vidya Mandir, Prayagraj

Projects

Opsentra : Centralized Logging Platform for DevOps Workflows

(April 2025 - Current)

Docker, Fluentd, AWS, MERN Stack, Tailwind CSS

- Aggregates logs from **Docker containers, AWS services, and Linux systems** into one unified platform.
- Built full-stack MERN web interface (React.js/Vite + Node/Express) for log visualization and management.
- Packaged Fluentd as a Docker image and published to Docker Hub for one-step container log collection.
- Automated end-to-end log forwarding for Docker Containers: **Container logs → Fluentd → Opsentra backend**, reducing log collection latency and doubling throughput..

Eventio: Scalable Movie Ticket Booking System (Backend)

(February 2025 - March 2025)

Node.js, Microservices, MongoDB, API Gateway

- Developed and designed a scalable backend microservices architecture with inter-service communication over **TCP/IP protocols**, isolating Auth, Booking, and Seat Management for improved maintainability.
- Implemented concurrency control for seat reservations ensuring **100%** atomicity.
- Optimized system performance by integrating Node.js Cluster and OS-level load balancing, achieving **7,500+ RPS** during stress testing (Autocannon) with consistent latency.
- Streamlined request routing via a centralized API Gateway, reducing interservice latency.

JOURNEE: Travel Booking Platform (End-to-End MERN Stack)

(September 2024 - December 2024)

MongoDB, Express.js, React.js, Cloudinary

- Designed and developed a full-stack travel booking website UI using **React.js**.
- Connected frontend and backend through RESTful APIs, enabling seamless real-time data communication.
- Integrated **Cloudinary** CDN for efficient image handling, reducing media load times and supporting performance for **100+ concurrent users**.
- Containerized both frontend and backend using **Docker** and deployed images to Docker Hub for portable, consistent development environments.

Skills

Programming Languages: C++, C, JavaScript, Python, Java, SQL

Web Technologies: React.js, Express.js, Node.js, Tailwind CSS, Puppeteer

DevOps & Cloud: Linux (Ubuntu), Docker, Jenkins(Basic), Git, AWS (EC2, S3, IAM)

Databases: MongoDB, MySQL

Tools: Postman, Multer, Cloudinary, VS Code

Soft Skills: Problem Solving, Project Management, Communication, Adaptability

Course Work: Operating System, Data Structures, DBMS, Object-Oriented Design

Achievements

- Cleared the first round of **TCS CodeVita**  Dec 2024 with an Global Rank of **1717**.
- Achieved a Leetcode  Contest rating **1,765+** (Top 9% globally).
- Solved **800+** problems and achieved a **365-day streak** badge on Leetcode .
- 5 stars in Problem Solving, C, Python on Hackerrank .

Certificates

- **Introduction to Cloud 101** - AWS Educate 
- **SQL (Advanced)** - Hackerrank 
- **Problem Solving(Intermediate)** - Hackerrank 
- **ReactJS, Javascript** - Infosys Springboard 
- **DevOps** - One Roadmap
