Education

Pranveer Singh Institute Of Technology, Kanpur, India

Bachelor of Technology – Major: Computer Science (Expected 2026)

CGPA: 8.5 (4th sem)

Maharishi Patanjali Vidya Mandir, Prayagraj, Uttar Pradesh

Intermediate (March 2021)

Percentage: 85%

JMG Sr. Secondary School, Pratapgarh, Uttar Pradesh

High School (March 2019)

Percentage: 92%

Projects

Eventio: Scalable Movie Ticket Booking System (Backend)

March 2025

Node.js, Microservices, MongoDB, API Gateway

- Developed and designed a scalable backend with microservices architecture, isolating Auth, Booking, and Seat Management for improved maintainability.
- Implemented concurrency control for seat reservations ensuring **100%** atomicity.
- Optimized system performance by integrating Node.js Cluster and OS-level load balancing, achieving **7,500+ RPS** during stress testing (Autocannon) with consistent **15–20ms** latency.
- Streamlined request routing and service orchestration via a centralized API Gateway, reducing inter-service latency by **30%**.

BeUnique: Cross-Platform Username Availability Tool (Full Stack)

February 2025

React.js, Node.js, Express.js, Puppeteer, Docker

- Engineered a full-stack solution to automate username availability checks, reducing manual search time from **3 minutes to 8 seconds per query (95% efficiency gain)**.
- Built a React frontend with debounced search and RESTful APIs, boosting user retention by **25%**, and deployed via Docker with NGINX, ensuring **99.8% uptime**.

JOURNEE: Travel Booking Platform (End-to-End MERN Stack)

December 2024

MongoDB, Express.js, React.js, Cloudinary

- Developed a full-stack travel booking platform supporting **100+ concurrent users**.
- Accelerated frontend-backend integration by **40%** through standardized API contacts and Postman testing.
- Implemented image upload/management via **Cloudinary CDN**, decreasing media load times by **65%** compared to local storage.

Skills

Languages: C++ (Primary), C, JavaScript, Python, Java, SQL

Frameworks: ReactJS, ExpressJS, NodeJS

Tools/Platforms: Docker, Linux, Postman, MongoDB, Git/Version Control

Libraries: NumPy, Pandas, Matplotlib, Puppeteer

Soft Skills: Problem-Solving, Project Management, Adaptability, Communication

Course Work

Operating Systems Data Structures and Algorithms Database Management System OOPs

Achievements

- Cleared the first round of TCS CodeVita 2024 (December) with an All India Rank of **637**.
- Achieved a contest rating of **1,667**, ranking globally on [Leetcode](https://leetcode.com).
- Solved **700+** problems and achieved a **365-day streak** badge on [Leetcode](https://leetcode.com).
- 5 stars in Problem Solving, C, Python on [Hackerrank](https://hackerrank.com).

Certificates

- ReactJS** – Infosys Springboard May 2024
- Problem Solving(Basic)** – Hackerrank April 2024
- Javascript, Python** – Programming Hub January 2024
