Professional Summary

Aspiring Software Developer with hands-on experience in **building scalable web applications using React.js, Express.js, and Django, along with designing microservices-based backend systems**; experienced in containerizing applications with Docker, automating AWS workflows, and applying strong problem-solving skills with solid CS fundamentals.

Education

Bachelor of Technology in Computer Science Engineering (2022 – 2026)

Pranveer Singh Institute of Technology, Kanpur

CGPA: 8.6/10

(Till 7th sem)

Skills

Languages: C#, C++, JavaScript, Python, Java (Basics), SQL

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs, Tailwind CSS

DevOps & Cloud: AWS, Linux (Ubuntu), Docker, Git, GitHub, Bitbucket

Databases: MySQL, MongoDB, PostgreSQL

CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Design

Work Experience

Infosys (Python Developer Intern) [Github](#) | [Link](#)

Nov 2025 – Jan 2026

- Led end-to-end development of **QuizGen**, designing system architecture and coordinating task distribution as team lead.
- Designed and integrated **RESTful Django APIs with PostgreSQL and React.js**, implementing secure authentication, profile management, and AI-driven quiz generation using **Gemini API**.
- Enhanced performance and UX through **client-side caching**, optimized state management, and consistent UI design.

Projects

Opsentra: Centralized Logging Platform [Github](#)

Jul 2025 – Jan 2026

Docker, AWS CloudWatch, EC2, MERN Stack, Tailwind CSS

- Built a centralized logging platform aggregating logs from **Docker containers, AWS services, and Linux** systems.
- Led the full-stack team in building a MERN dashboard for centralized log visualization.
- Implemented backend services to automatically forward **system and Docker logs from EC2 instances to AWS CloudWatch** and fetch logs for visualization.

Eventio: Movie Ticket Booking System (Backend) [Github](#)

Feb 2025 – Apr 2025

Node.js, Microservices, MongoDB

- Developed and designed a scalable backend microservices architecture with inter-service communication over **TCP/IP protocols**, isolating Auth, Booking, and Seat Management.
- Implemented concurrency control for seat reservations ensuring **100%** atomicity.
- Optimized system performance by integrating Node.js Cluster and OS-level load balancing, achieving **7,500+ RPS** during stress testing (Autocannon) with consistent latency.

JOURNEE: Travel Booking Platform (End-to-End MERN Stack) [Github](#) | [Link](#)

(Sep 2024 – Dec 2024)

MongoDB, Express.js, React.js, Cloudinary

- Designed and developed a full-stack travel booking website UI using **React.js and Express.js**.
- Integrated **Cloudinary CDN** for efficient image handling, reducing media load times and increasing performance.
- Containerized both frontend and backend using **Docker** for consistent development environments.

Achievements

- Cleared Round 1 and Round 2 of **TCS CodeVita 2025**
- Secured a global rank of **1717** in **TCS Codevita 2024**.
- **LeetCode** rating **1750+ (Top 9%)**, solved 900+ DSA problems.
- 5-star in Problem Solving, C, Python on **HackerRank**.

Certificates

- **Introduction to Cloud 101** - AWS Educate [Credential](#)
- **SQL (Advanced)** - Hackerrank [Credential](#)
- **Problem Solving(Intermediate)** - Hackerrank [Credential](#)
- **ReactJS, Javascript** - Infosys Springboard [Credential](#)
- **DevOps** - One Roadmap [Credential](#)
